

Field Treatment

1. Basic airway/spinal immobilization prn/control major bleeding prn
2. Oxygen prn
3. Shock position prn

PERFUSING

4. Venous access prn
5. Traction/splints/dressings prn
①
6. Consider **morphine 2-12mg** IVP for localized trauma
① ② ③ ④
☞ May repeat prn
7. Reassess for potential deterioration.

POOR PERFUSION

4. Cardiac monitor/document rhythm and attach EKG strip
- Note:** ②
5. Venous access
6. Fluid resuscitate
7. Traction/splints/dressings prn
①

Drug Considerations

Morphine:

- ① Alternate routes: 12mg IM one time
- ② Use with caution if BP < 100 systolic or altered LOC.
- ③ Maximum adult dose: 20mg
- ④  Pediatrics: see Color Code Drug Doses/L.A. County Kids

Special Considerations

- ① Treatment for specific injuries:
 - ✓ **Poor neuro/vascular status** realign and stabilize long bones
 - ✓ **Joint injury** – splint as lies
 - ✓ **Midshaft femur** – splint with traction
- ② DO NOT delay transport for treatment.
